PART I: REPORT DETAILS							
Report title	eport title End of Program Evaluation: Women's Leadership, Empowerment, Access and Protection (LEAP) in Somalia Geographical Coverage National				National		
Sequence number		29	Evaluators	[Female]	[Male]	Year	2022
Region		Eastern and Southern Africa	Country(ies)	Somalia		Type of intervention evaluated	Programme
Portfolio Budget (USD)			Evaluation Budget (USD)		·	Reviewer	C. Marcondes
Strategic Plan Thematic Area (select all that apply)		Women's leadership and	Women's access to economic			Review Date	10 January 2023

PART II: THE EIGHT KEY PARAMETERS				
SECTION 1: OBJECT AND CONTEXT OF THE EVALUATION (weight 5%)	RATING	Very Good		
Does the report present a clear and full description of the 'object' of the evaluation?	100%	Executive Feedback on Section 1		
1.1 The report clearly specifies the object of the evaluation, and provides a clear and complete description of the intervention's original logic (e.g. expected results chain or theory of change), timeframe, intended beneficiaries by type, geographic location(s) as well as the planned budget of the intervention. Note: Please address all aspects of this sub-criteria. If the project did not have a ToC, clearly outline the expected results of the	Fully	The intervention is well described with information on the ToC and budget, along with an overview of the key partners and stakeholders involved in their implementation and Fully geographic areas of intervention. Some high level information about the timeline is included. The context is also well described.		
intervention and how the activities were expected to lead to the results 1.2 The context includes factors that have a direct bearing on the object of the evaluation: social, political, economic, demographic and institutional. This also includes explanation of the contextual gender equality and human rights issues, roles, attitudes and relations.	Fully			
Note: This section should be concise but sufficient to cover key contextual issue.				
1.3 The key stakeholders involved in the implementation, including the implementing agency(ies) and partners, other stakeholders and their roles are described. Note: Remember to include not only a list of partners but also a description of their main activities and/or the role they had in the implementation of the intervention in the body of report. Detailed description and stakeholder analysis can be provided in annexes.	Fully			
1.4 The report identifies any changes in the timeframe and/or implementation plans (e.g. original plans, strategies, logical frameworks), provides an explanation for these and for any implications these may have had regarding the evaluation. Note: Remember to identify the implementation status of the object, including its phase of implementation and any significant changes.	Fully			
SECTION 2: PURPOSE, OBJECTIVES AND SCOPE (weight 5%)	RATING	Very Good		
Are the evaluation's purpose, objectives and scope sufficiently clear to guide the evaluation?	100%	Executive Feedback on Section 2		
2.1 Purpose, objectives and use of evaluation: The evaluation report provides a clear explanation of the purpose and the objectives of the evaluation, including the intended use and users of the evaluation and how the information will be used.	Fully	The purpose, objectives, use and scope of evaluation are not clearly outlined but information is provided on the scope and evaluation use. Suggest to more clearly outline those.		
2.2 Evaluation Scope: The evaluation report provides a clear description of the scope of the evaluation, including a description of the timeframe and outputs/outcomes covered, and not covered (thematically, geographically etc.) as well as the reasons for this scope (e.g. specifications by the ToR, lack of access to particular geographic areas for political or safety reasons at the time of the evaluation, lack of data/evidence on particular elements of the intervention).	Fully			
SECTION 3 : METHODOLOGY (weight 15%)	RATING	Very Good		
Is the methodology used for the evaluation clearly described and appropriate, and the rationale for the methodological choice justified?	87%	Executive Feedback on Section 3		
3.1 Methodology: The report provides a complete description of the methods used for data collection and analysis, the chosen evaluation criteria and evaluation questions, and demonstrate that the methods chosen are appropriate to inform the responses to the criteria and questions. Note: An evaluation matrix containing the evaluation questions in each evaluation criteria, the indicators, the data sources and	Fully	The methodology is well described and the detailed information in the Annex helps to show that the methods were appropriate to provide responses to evaluation questions, and for the triangulation, analysis and assessments of GE/HR specific results. Data collection, analysis and sampling should have been explained in more detail and the		
methods for data collection is useful to show these, but it is still important to include some explanations in the body of the document to clearly demonstrate that the methods are appropriate for triangulation. Remember to keep this section succinct and use annexes to provide detailed information.		sampling description should provide the reader with assurance that those stakeholders consulted represented well the universe of the project partners/stakeholders, including the selection of the field trips. References to adherence to ethics and specific evaluation		

3.2 Data collection, analysis and sampling: The report clearly describes the tools used for data collection and the rationale for their selection as well as the sampling strategy and methods used for data analysis. The report includes discussion of how the mix of data sources was used to obtain a diversity of perspectives, to guide the assessments of GE/HR specific results and to ensure data accuracy and completeness. Note: Please describe not only the types of data collection tools used (e.g. surveys, KIIs, desk review) but also how the data was collected (where, when, who, how) and what steps were taken to analyze it. Remember to include a description of original sampling strategy and the extent to which it covers the range of stakeholders involved in the intervention, with a clear justification of the selection of the targeted sample. Use annexes to provide detailed description.	Mostly	standards (e.g. UNEG guidelines) during the evaluation are included.
3.3 Stakeholders Consultation: The evaluation report gives a complete description of the stakeholder consultation process in the evaluation, including the rationale for selecting the particular level and activities for consultation. Note: Include a stakeholder mapping, showing that the consultation process was comprehensive to assure the reader that the selection of KIs and/or survey participants was appropriate and representative of the universe of project stakeholder (in line with descriptions under item1.3 above). Use annexes to provide detailed description.	Fully	
3.4 Limitations: The report presents a clear and complete description of limitations and constraints faced by the evaluation and if/how these were mitigated (e.g. gaps in the evidence, biases due to limits in stakeholder consultations, etc.).	Fully	
3.5 Ethics: The evaluation report makes explicit references to the ethical obligations of the evaluators and shows evidence that data collection and tools adhered to these ethical principles, (e.g. mechanisms and measures were implemented to ensure that the evaluation process conformed to relevant ethical standards, including but not limited to, informed consent of participants, confidentiality and avoidance of harm considerations). Note: Mentioning/referencing UNEG standards in the report does not amount to sufficient evidence that the data was actually collected with sensitivity to ethics and discrimination. It is a good practice to provide a clear explanation as to how the evaluation adopted these, showing examples of tools and processes used were sensitive to ethical considerations (e.g. consent, confidentiality) and were not discriminatory against particular group's participation (i.e. were interviews or focus groups held in a location, at a time, in a setting, using language/translation, that is appropriate and respectful; and facilitates the participation of a full range of stakeholders). Use annexes to provide detailed description.	Fully	

SECTION 4: FINDINGS (weight 20%)	Rating	Good		
Are the findings well substantiated, clearly presented, relevant and based on evidence?	57%	Executive Feedback on Section 4		
4.1 Findings are presented with clarity, logic and coherence (e.g. avoid ambiguities). Note: It is a good practice to clearly outline the findings in the report, preferably using a "set" of findings statements, with clear articulation and conciseness, followed by substantiation and full demonstration of the evidence used to formulate the findings' statements.	Partly	A set of findings statements in response to the evaluation questions were not formulated and should have been included, clearly articulating the responses. The findings are presented in line with the evaluation criteria and the questions are presented, but the analysis and evidence presented does not address the criteria properly (e.g relevance). The findings are well substantiated in the narrative but data source/evidence for certain tables/charts (e.g. Table 2 & 3) should also have been included. The causal-effect explanations are well explained.		
4.2 The evaluation findings are well substantiated, and provide sufficient levels of high quality evidence to systematically ad-dress the evaluation questions and criteria.	Mostly			
Note: Ensure the findings narrative are consistent with the findings statements and fully back the statement, showing the evidence and triangulation clearly.				
4.3 Findings reflect systematic and appropriate analysis and interpretation of the data; they are free from subjective judgments.	Partly			
Note: in addition to describing the implementation of activities and completion of outputs, include an analysis of their contributions towards the intervention outcomes.				
4.4 Are cause and effect links between an intervention and its end results explained and any unintended results highlighted?	Fully			
Note: Remember to include information on both the cause/effect links and unintended results				
SECTION 5: CONCLUSIONS AND LESSONS LEARNED (weight 20%)	Rating	Fair		
Are the conclusions clearly presented based on findings and substantiated by evidence?	37%	Executive Feedback on Section 5		
5.1 Conclusions are well substantiated by the evidence presented and are logically connected to evaluation findings. Note: Conclusions are not summaries of findings but they are formulated from the analysis and interpretation of the findings, giving meaning to them.	Partly	A Conclusions chapter is included as a set of "final remarks" which is not aligned with the criteria of this section. They should have been formulated as a set of evaluation conclusions in line with the evaluation criteria, logially connected and summarizing the findings. They should also have added further analysis in line with these and provided		
5.2 The conclusions reflect reasonable evaluative judgments that add insight and analysis beyond the findings. Note: Conclusions should provide explanations for the findings and form the basis for recommending actions or decisions that are consistent with the conclusions.	Partly	more insights, going beyond the findings and described some issues presented in the recommendations section (paving the way to those recommendations). They should also have put forward the strengths and weaknesses identified based on the evidence. A		
5.3 Conclusions present the strengths and weaknesses of the object (policy, programmes, projects or other intervention) being evaluated, based on the evidence presented and taking due account of the views of a diverse cross-section of stakeholders.	Partly	good set of Lessons is included.		
5.4 Lessons Learned: When presented, the lessons learned section stems logically from the findings, presents an analysis of how they can be applied to different contexts and/or different sectors, and takes into account evidential limitations such as gen-eralizing from single point observations.	Fully			
Note: The lessons learned from an evaluation comprise the new knowledge gained from the particular circumstance (initiative, context outcomes and even evaluation methods) that is applicable to and useful in other similar contexts. They should demonstrate the intervention experience and be generalized to enable applicability by other interventions.				
SECTION 6: RECOMMENDATIONS (weight 15%)	Rating	Very Good		
Are the recommendations relevant, useful, actionable and clearly presented in a priority order?	80%	Executive Feedback on Section 6		
6.1 Recommendations are well grounded on the evaluation, logically derived from the findings and/or conclusions. Note: The recommendations should be complete in number and depth, reflecting the analysis in the findings and conclusions and address the issues identified earlier.	Mostly	A good set of Recommendations are included and derive from the conclusions, although they should have more clearly reflected the analysis in the findings section, addressing issues identified then. The recommendations are pertinent but should have contained more detailed information about a set of actions to be undertaken, describing not only what needs to be done but also who should do it, the steps needed to be taken and the		

6.2 The report describes the process followed in developing the recommendations including consultation with stakeholders. Note: Include a relevant explanation on the extent to which the evaluation participants were specifically consulted for the formulation of the recommendations and/or the level of participation of stakeholders in this evaluation stage.	Fully	rationale for those actions. There are references to the process and they were also prioritized.
6.3 Recommendations are clear, realistic (e.g. reflect an understanding of the subject's potential constraints to follow-up) and actionable. 6.4 Clear prioritization and/or classification of recommendations to support use.	Mostly Fully	

SECTION 7: GENDER AND HUMAN RIGHTS (weight 15%)	Score	Meets Requirements
Does the evaluation meet UN SWAP evaluation performance indicators? Note: this section will be rated according to UN SWAP standards.	78%	Executive Feedback on Section 7
7.1 GEWE is integrated in the evaluation scope of analysis and evaluation criteria and questions are designed in a way that ensures GEWE related data will be collected. Note: Refer to the UNEG UN-SWAP Evaluation Performance Indicator Technical Note for guidance on this section.	Fully integrated (3)	GEWE is fully integrated. Even though there is no assessment of data on specific gender results, the project focus is on gender integration, so it is integrated in the evaluation scope. Gender is also a stand alone criteria and gender-related evaluation questions
7.2 A gender-responsive methodology, methods and tools, and data analysis techniques are selected. Note: it is not enough to simply describe the methodology as "gender-responsive", it is important to demonstrate that the data	Satisfactorily integrated (2)	were provided in the report. The methodology was satisfactorily gender-responsive to the extent in which t uses mixed data collection methods and contain references to confidentiality and ethical guidelines. There were no specific references to show how
rote: It is not enough to simply describe the memouology as "gender-responsive", it is important to demonstrate that the data collection and analysis integrated gender considerations; that data was collected disaggregated by sex; that methods/tools were designed to enable GEWE assessments; and/or that processes employed (i.e. sampling, triangulation, validation) ensured inclusion and enabled data for GFWE analysis.		gender-responsiveness was reflected in the tools and methods. Gender analysis is satisfactorily reflected in the report. Background section, findings, conclusions and recommendations contain gender-related analysis although explicity references and
7.3 The evaluation findings, conclusions and recommendation reflect a gender analysis.	Satisfactorily integrated (2)	disaggregated data is not presented. Unanticipated effects were not identified.
Note: Please address all aspects of this sub-criterion. SECTION 8: THE REPORT PRESENTATION (weight 10%)	Rating	Very Good
is the report well structured, written in accessible language and well presented?	83%	Executive Feedback on Section 8
8.1 Report is logically structured, concise and of reasonable length, well written and presented with clarity and coherence (e.g. the structure and presentation is easy to identify and navigate (numbered sections, clear titles and subtitles, context, pur-pose and methodology would normally precede findings, which would normally be followed by conclusions, lessons learned and recommendations) and is written in accessible language with minimal grammatical, spelling or punctuation errors. Note: Reasonable length for project/programme and CPE evaluations is about 40 pages (excluding Annexes 60 pages); and 50 pages for institutional and thematic evaluations (excluding Annexes 60 pages).	Mostly	Report is complete and well presented but slightly long and should be shortened to about 40 pages to encourage evaluation use. Ensure all graphs/charts contain information about their source. The report structure is appropriate and the inital pages are complete. Most key annexes are included but the evaluation questionnaires should have been included (as opposed to uploaded as files which do not show in a PDF format). The list of documents consulted should also have been itemized. Opening pages are complete and the executive summary is a stand-alone section.
8.2 The title page and opening pages provide key basic information on the name of evaluators and, timeframe of the evaluation, date of report, location of evaluated object, names and/or organization(s) of the evaluator(s), name of organization commissioning the evaluation, table of contents including, as relevant: tables, graphs, figures, annexes-; list of acronyms/abbreviations, page numbers.	Fully	
8.3 The Executive Summary is a stand-alone section that includes an overview of the intervention, evaluation purpose, objectives and intended audience, evaluation methodology, key findings, conclusions and recommendations. The Executive summary should be reasonably concise.	Fully	
Note: Executive Summaries should be maximum 5-6 nages long. 8.4 Annexes should be of reasonable length and include, when not present in the body of the report: ToR, evaluation matrix, list of interviewees, list of site visits, data collection instruments (such as survey or interview questionnaires), list of documentary evidence. Other appropriate annexes could include: additional details on methodology, copy of the results chain, information about the evaluator(s).	Mostly	
Note: Annexes should be maximum 60 pages long.		
Additional Information		
Identify aspects of <i>good practice</i> of the evaluation Note: This section is to be populated by the QA Reviewer only, based on the overall Evaluation Report. No need to identify specific elements related to this section.	N/A	

[Piloting] SECTION 9: DISABILITY INCLUSION (weight: 5%) * The score for Section 9 will be 'bonus points' (5%), on top of the existing 100% weight. ** Assessment is based on the UN Disability Inclusion (For further details, please refer to Technical Notes on Entity Accountability Framework).	SCALE (No, Partially, Yes)	OVERALL ASSESSMENT for DISABILITY INCLUSION (Missing, Partial, Sufficient)	
Does the evaluation include consideration of disability inclusion?		Partial	
9.1 The evaluation questions include references to disability inclusion.	No	Qualitative Feedback (Please highlight any findings on disability inclusion): There was no specific references to disability inclusion in the evaluation questions but the methodology refers to sampling PWD for consultation. The topic was not covered in a few findings, but not in the	
9.2 The evaluation methodology includes references to disability inclusion.	Yes	conclusions and recommendations.	
9.3 The Evaluation findings, conclusions and/or recommendations contain references to disability inclusion.	Partially		

PART III: THE OVERALL RATING				
Key Guiding Question	Total weighted score %	Overall Rating	Other reviewer's comments	
Is this a credible report that addresses the evaluation purpose and objectives based on evidence, and that can therefore be used with confidence?	72.27	Cook	This evaluation report contains some gaps related to providing direct and clear responses to the evaluation questions and putting forward conclusions addressing the evaluation criteria. However, the assessments are well substantiated, a good set of lessons and recommendations are also included.
