UN Women ROAS is seeking a consultant to conduct an evaluation on its *Women’s Leadership, Empowerment, Access & Protection in Crisis Response (LEAP)* regional project to contribute to enhancing UN Women’s approach to promoting the economic empowerment of refugee and internally displaced women in the Arab States region.

#### I. Background:

The Arab States region has been experiencing a significant number of humanitarian crisis. Three of the world’s worst humanitarian crises are in the Arab States region: in Syria, Yemen and Iraq. The civil war in Syria has resulted in the largest number of refugees worldwide, at more than 4.8 million refugees, and in additional 6.5 million internally displaced persons (IDPs) inside Syria.¹ This crisis not only affects refugees and displaced on all levels, but has put pressures on neighboring host countries which have experienced increased levels of unemployment and poverty and socio-political and economic unrest. Moreover, the spill over effect of the Syria crisis has further destabilised Iraq. Conflict with armed groups in Iraq, including ISIL, has forced nearly 3.2 million people² to flee their homes since January 2014. While a growing number of people are returning to their homes since Iraqi led military efforts have retaken large areas of the country, these areas suffer from substantial damage to private property and public infrastructure - putting more pressure on the lives of the returnees.

Although the living conditions of the displaced differ across countries, the majority live in poverty and many are food insecure.³ Most have depleted their savings and resources, and rely on negative coping mechanisms to meet their basic needs. This is particularly true for female headed households not living with other refugees, who are the most food insecure in the region.⁴ Furthermore, women are reporting increasing domestic violence within their homes due to “decreasing economic and household security.”⁵

Employment continues to be a challenge across the region. The region has a bulging youth population with high unemployment numbers, and refugees in countries hosting them are adding to these challenges. For example, the current unemployment rate in Egypt is 13.2%, with youth unemployment at 34.3%. Unemployment is almost triple among female young people of their male counterparts. As such, while refugees are legally allowed to work in most countries across the region, in practice they face severe constraints in accessing legal work and restore to informal labour – which is characterized by underemployment and exploitation. For example, in Jordan around 30,000 refugees currently have work permits (of which 1% are women)⁶, out of a case load

---

² IOM’S Displacement Tracking (DTM), October 2015.
³ In Turkey, one-third of households recently interviewed by WFP were determined to being food insecure, leaving the majority of 66 per cent at risk of food insecurity. WFP. 2016. “Off camp Syrian refugees in Turkey”.
⁴ WFP and REACH. 2015. “Comprehensive food security monitoring exercise for Jordan”.
⁵ UN Women. 2014. “Beyond the camps: A perception study”.
of close to 650,000, and in Egypt the UN recorded 432 as accessing waged employment opportunities (formal and informal) between January and July 2016, out of a caseload of 116,013. The needs and vulnerabilities of women, men, girls and boys affected by crisis are distinct and often different. Addressing these needs with effective, quality programming requires incorporation of gender equality considerations across all phases of humanitarian action – including preparedness, assessment, analysis, planning and implementation. Linking humanitarian action with development early on in emergency settings and integrating early recovery as a part of the response also increases the ownership, participation, relevance and sustainability of humanitarian efforts.

In July 2010, the United Nations General Assembly created UN Women, the United Nations Entity for Gender Equality and the Empowerment of Women. The creation of UN Women came about as part of the UN reform agenda, consolidating the Organization’s resources and mandates for greater impact. The mandate of UN women entrusts the entity to take a leading role in normative, operational and coordination work on gender equality in the UN system, including on Women’s Peace and Security and Humanitarian Action.

At global level, UN Women’s work in humanitarian action falls under Strategic Plan Development Results Framework Outcome Area 4 – “Peace and security and humanitarian action are shaped by women and men’s equal leadership and participation. In 2012, UN Women developed a flagship programme on Women’s Leadership, Empowerment, Access and Protection in Crisis Response (LEAP) to improve the gender-responsiveness of humanitarian action by:

i. Ensuring that humanitarian/crisis response planning, frameworks and programming are informed by gender analysis and needs assessments.

ii. Increasing access to protection and economic opportunities for vulnerable and displaced women affected by sudden onset emergencies through safe/social spaces and income generation opportunities. These social spaces promote awareness raising; access to multi-sectoral services and referral mechanisms; women support groups; child-care services; as well as facilitating access to skills training, cash-for-work and livelihood support.

iii. Bridging the humanitarian/development divide in protracted and slow onset crises by promoting positive coping mechanisms, and sustainable livelihoods for marginalized women.

UN Women in the Arab States region has been implementing components of the LEAP programme since 2012 in Jordan, and since 2014 in Egypt, Iraq and Lebanon. Central to this approach has been supporting economic opportunities for displaced and vulnerable women. As the crisis in the region have become protracted, there is a recognition of the need to move from short-term cash assistance to more sustainable economic opportunities. Through its current regional project, Women’s Leadership, Empowerment, Access & Protection in Crisis Response (LEAP), launched in March 2016, UN Women is working to consolidate its ongoing initiatives including those related to women’s economic opportunities - with the objective of supporting sustainable solutions for refugee, displaced, and host communities where viable, and working with regional bodies to support an end to conflict and instability.

The regional LEAP has one outcome and three outputs related to the economic empowerment of displaced and vulnerable women and girls, specifically:

**Outcome II:** Displaced and vulnerable women and girls are economically empowered and have access to humanitarian services that are gender inclusive

Output 2.1: Gender analysis and assessments conducted to inform multi-sectoral humanitarian/crisis response planning and programming.

Output 2.2: Increased capacity and effective engagement of women & gender machineries in humanitarian planning and response frameworks.

---

https://data.unhcr.org/syrianrefugees/country.php?id=8
Output 2.3: Displaced and marginalized women and girls have new sources of income and economic opportunities through Direct Cash Assistance, cash for work and skills development.

Activities related to the creation of economic opportunities under this outcome include: (i) the identification of sustainable income-generation opportunities for vulnerable women from both refugees and host communities through a rapid business needs analysis within affected regions in the three countries to identify the exact needs of vulnerable women and sustainable income-generation activities; (ii) financial support which includes direct cash assistance, cash-for-work, and start-up packages schemes based on the country context and needs assessment; (iii) vocational training and business development skills programmes; (iv) linkages and referral to job placement capitalizing on the ongoing activities in the countries.

The project is implemented in Egypt, Iraq and Jordan to address the immediate needs of women affected by conflict, bolstering their assets and skills to enable them to meet their needs with investment in women’s economic empowerment8 to generate immediate and long-term social dividends. The WEE component is part of more holistic approach that combines economic empowerment, enhanced protection and safe spaces and gender inclusive humanitarian services which are shaped by women’s leadership and engagement in community life and relief efforts.

In **Egypt and Lebanon**, UN Women has supported community centers in host communities to provide vulnerable Syrian refugee and host community women with capacity building programmes, vocational training and access to financial services, as well as, strengthening their protection through engaging different key players including women and youth CSOs, national service providers and local authorities to address issues related to all kinds of violence. In Lebanon, UN Women has also supported the establishment of women agro-business cooperatives with Syrian and Lebanese members, as well as job placement programmes.

In **Iraq**, UN Women supports Syrian women refugees within camps and displaced women and girls dispersed across various districts and cities in Iraq due to the ongoing conflict through providing safe access to livelihood opportunities. This has included support to cash for work/income generation activities while simultaneously offering protection and psycho-social support services, through the already established women’s resource and protection centers. Women in host communities are also supported with livelihood enhancing interventions. UN Women has capitalized on existing interventions of cash-for-work schemes and income generation opportunities applied in camps and recently in the newly liberated areas.

In **Jordan**, the project addresses the humanitarian priorities of Syrian women refugees living in camp (Azraq and Za’atari) and non-camp settings through the provision of employment, services for those at risk of and surviving gender-based violence, and engagement with the national authorities to promote access to justice and accountability for violent crimes against women.

Outcome III9 which focuses on the protection of vulnerable women and girls through the creation of safe spaces and increased access to effective services and protection mechanisms has synergies with the economic empowerment component as some of the activities/services are implemented in the safe spaces. The safe/social spaces also serve as ‘economic empowerment hubs’ by strengthening women’s access to productive assets and skills, supporting their leadership in community life and decision making, and targeting gender-specific structural barriers and discrimination rooted in prevailing social norms and attitudes.

Key stakeholders for this evaluation include: i) specialized humanitarian agencies ii) Member States; iii) bilateral donors; iii) humanitarian country teams (HCTs) at country level; iv) cluster coordinators and lead agencies; v) Key national stakeholders (Ministries, National Women

---

8 *Women’s economic empowerment* can be defined as the ability of women to bring about positive changes in their lives and societies as a result of their participation in economic activities. These activities include their ability to: function effectively in the economy; participate in labour and product markets on equal terms with men; shape the gender division of labour within the households and the labour market; accumulate their own assets; and influence governance and institutional structures that inform the relationship between the market and the state and the processes that determine the pace of economic development. They are underpinned by rights. It is generally accepted that women’s economic empowerment cannot be achieved without women also having agency in other areas of their lives.

9 Outcome III: Protection and safety of displaced women and girls in temporary shelters & in host communities is strengthened against all forms of violence and exploitation.
machineries); vi) Regional intergovernmental bodies (the Arab League) working in humanitarian action as well as regional coordination structures (e.g. Agency Group on Emergency Preparedness and Response (MENA Group); and vii) international and national non-governmental organizations working in the humanitarian field.

II. Duties and Responsibilities:

The main purpose of this evaluation is to contribute to enhancing UN Women’s approach to supporting the economic empowerment of displaced and vulnerable women and girls in the Arab States region. The findings will be used for strategic policy and programmatic decisions, organizational learning and accountability as well as for the identification of good practices to promote sustainable economic opportunities which strengthen women’s resilience and empowerment. The targeted users of the evaluation are UN Women Senior Management at regional and country level, programme staff, and key stakeholders (donors, other regional actors, UN system) in the area of Humanitarian Action, particularly those focused on livelihoods and economic opportunities.

The evaluation will have both formative and summative elements. While UN Women has been implementing components of the LEAP flagship in the Arab States region since 2012, the approach to supporting refugee and displaced women’s economic empowerment has evolved over the years as UN Women has tested ways to make interventions (economic opportunities) more sustainable. As such several of the interventions assessed are in their initial stages and will require a primarily formative evaluation lens. At the same time, the evaluation will assess interventions which have been implemented for several years where more of a summative approach is possible.

The evaluation will focus on UN Women’s initiatives in promoting economic opportunities for displaced and vulnerable women affected by humanitarian crisis in the region. The scope will be limited to those initiatives which seek to promote longer-term economic opportunities, and will therefore not include cash for work. Examples of women who have been able to leverage their participation in cash for work to start their own businesses may be included to provide insights into success factors. To the extent that there are linkages with the broader work on protection and specifically the safe spaces, this will be included as well. The geographic scope of the evaluation is multi-country; it will include economic empowerment interventions under the WPS and HA portfolio in Egypt, Iraq, Jordan and Lebanon. The evaluation will assess relevant work from 2012 to the present.

Several evaluations have already been conducted on UN Women’s LEAP aligned interventions in the Arab States region which have assessed their relevance, efficiency and effectiveness. This evaluation will build on these evaluations and focus on two main evaluation OECD-DAC criteria, effectiveness and sustainability. This limited focus will allow UN Women to examine these critical issues in greater depth than previous evaluations. In conjunction with the sustainability criterion, UN Women will assess connectedness, a criterion often used in humanitarian action evaluations.

The specific objectives of the evaluation are to:

1. Assess the effectiveness of UN Women’s approach to economic empowerment of refugee and internally displaced women within the framework of the LEAP (and host community focused WEE related programming in Jordan)

2. Assess the connectedness and sustainability of UN Women’s initiatives on increasing economic opportunities for refugee and internally displaced women

3. Identify and validate lessons learned, good practice examples and innovation of work supported by UN Women;

4. Provide actionable recommendations with respect to UN Women’s approach to promoting women’s economic opportunities in humanitarian settings.
Evaluation Questions:

Effectiveness

1. How effective have the economic opportunity models developed and / or implemented by UN Women been in helping women find employment (self or other) once project participation is completed? To what extent are the opportunities created ensuring the safety and security of women?

2. To what extent have the safe / social spaces established / supported through UN Women served as ‘economic empowerment hubs’, by strengthening women’s access to productive assets and skills, supporting their leadership in community life and decision making, and targeting gender-specific structural barriers and discrimination rooted in prevailing social norms and attitudes?

3. What are the intended and unintended, positive and negative, effects of the intervention on women and men, institutions and the physical environment? How has the intervention affected the well-being of the different groups of stakeholders?

Connectedness and Sustainability

1. To what extent are the models developed and / or implemented by UN Women to promote women’s economic empowerment supporting sustainable economic opportunities, particularly for host community women? What are the measures that have been built in to promote sustainability? To what extent do these measures reflect on and take into account factors which, have a major influence on sustainability e.g. economic, ecological, social and cultural aspects?

2. To what extent do interventions, as designed and implemented, take longer-term and interconnected problems into account? Do they contribute to interventions planned in the longer term, such as recovery or development?

3. What is the potential to scale existing models to reach larger groups of women?

III. Evaluation Methodology

The evaluation will be a transparent and participatory process involving relevant UN Women stakeholders and partners at the regional and country levels. The evaluation will be based on gender and human rights principles, as defined in the UN Women Evaluation Policy5 and adhere to the United Nations norms and standards for evaluation in the UN System6. The evaluation methodology will employ mixed methods and an innovative approach for capturing results, to ensure that the views of a diverse group of participants are represented in the evaluation. The evaluation Consultant is expected to collect both primary quantitative and qualitative data. Qualitative methods adopted should be highly participatory in nature, drawing on more non-traditional methods, e.g. most significant change, network analysis, mapping, video, etc. The analysis of the application of human rights and gender equality principles in the development and implementation of interventions will be an integral part of the final evaluation report.

The evaluation process has five phases:

1) Preparation: gathering and analyzing programme data, conceptualizing the evaluation approach, internal consultations on the approach, preparing the TOR, establishment of the reference group, and recruitment of the evaluation Consultant (responsibility of UN Women);

2) Inception: consultations between the evaluation Consultant and the Regional Office, programme portfolio review, stakeholder mapping, inception meetings with the reference group, review of the results logic for LEAP related interventions, finalization of evaluation methodology and inception report;

3) Data collection and analysis: desk review, in-depth review of regional and relevant country level planning frameworks and programme documents, and online interviews, staff and partner survey/s, visits to two countries;
4) **Analysis and synthesis stage**: analysis of data and interpretation of findings, and drafting of an evaluation report; and

5) **Dissemination and follow-up**: development of a Management Response, publishing of the evaluation report, uploading the published report on the GATE website\(^{10}\), and production of other knowledge products and learning events, such as a webinar and an evaluation brief (responsibility of UN Women).

### IV. Evaluation Management

The UN Women ROAS is responsible for the management and quality assurance of this regional evaluation. ROAS will manage the evaluation process, constitute a quality assurance system and provide administrative and substantive support, including possibly joining the evaluation Consultant in selected field missions. The UN Women Independent Evaluation Office (IEO), through the Regional Evaluation Specialist (RES) for the Arab States, will ensure that the evaluation is conducted in accordance with the UN Women Evaluation Policy, United Nations Evaluation Group Norms and Standards, Ethical Guidelines and Code of Conduct for Evaluation in the UN System and other key guidance documents\(^{11}\).

The establishment of reference groups will help to ensure that the evaluation approach is robust and relevant to staff and stakeholders, and make certain that factual errors or errors of omission or interpretation are identified in evaluation products. The core reference group will provide input at key stages of the evaluation: terms of reference; inception report; draft and final reports. It will be composed of UN Women senior managers/staff, other UN System partners, key regional and country level partners and civil society.

### V. Deliverables and Payment Schedule

The proposed timeframe for the evaluation is March to May 2017. The proposed time frame and expected products will be discussed with the evaluation Consultant and refined in the inception report. The Regional Office reserves the right to ensure the quality of products submitted by the external evaluation Consultant and will request revisions until the product meets the quality standards as expressed by the UN Women Independent Evaluation Office.

---

**VI. Inputs**

This will be a homebased assignment with possible travel to Jordan, Egypt, Iraq and Lebanon. UN Women will provide support in facilitating contact with partners and identification of relevant resource persons for all components of the assignment.

**VII. Performance evaluation**

The consultant’s performance will be evaluated based on: timeliness, responsibility, initiative, communication, accuracy, and quality of the products delivered.

**VIII. Competencies:**
Core Values:
- Respect for Diversity;
- Integrity;
- Professionalism.

Core Competencies:
- Awareness and Sensitivity Regarding Gender Issues;
- Accountability;
- Creative Problem Solving;
- Effective Communication;
- Inclusive Collaboration;
- Stakeholder Engagement;
- Leading by Example.

Functional Competencies:
- Excellent technical expertise and skills in conducting evaluation.
- Demonstrable experience in humanitarian action and women economic empowerment in Arab region.
- Excellent writing skills.
- Ability and willingness to work as part of a team to meet tight deadlines and produce high quality work.

IX. Required experience and qualifications

The consultant should have extensive experience in evaluation, humanitarian action and women’s economic empowerment, as well as regional experience. The consultant must sign the “Evaluation consultant’s agreement form,” based on the UNEG Code of Conduct and Ethical Guidelines for Evaluation in the UN system.

The consultant, with at least 15 years of evaluation experience, will be responsible for delivering the key evaluation products. In close collaboration with the Evaluation Task Manager (RES), s/he will lead the conceptualization and design of the evaluation, the coordination and conduct of the country visits and the shaping of the findings, conclusions and recommendations of the final report.

More specifically the tasks of the consultant include:
- Developing an inception report outlining the design, methodology and the criteria for the selection of the case studies, required resources and indicative work plan.
- Directing and supervising the research and analysis of secondary evidence, project documents, databases and all relevant documentation.
- Coordinating the conduct, overseeing and assuring quality of country visits, and taking a lead in the analysis of evaluation evidence.
- Preparing the PPT presentation and leading the briefing on preliminary evaluation findings.
- Drafting the evaluation report and leading the preparation of specific inputs based on country visits, desk research, focus groups, surveys, etc.
- Preparing for meetings with the Evaluation Task Manager and other stakeholders to review findings, conclusions and recommendations.
- Leading the stakeholder feedback sessions, briefing the Evaluation Task Manager on the evaluation through informal sessions and finalizing the report based on feedback from the Evaluation Task Manager.
- Participating in a Webinar to present evaluation results.

Qualifications:
• At least 15 years practical experience in conducting evaluations of international policies and programmes utilizing a wide range of approaches and methods including utilization focused, gender and human rights responsive, and mixed methods with a background in political science

• Substantial professional experience (at least 5 years) related to women’s economic empowerment and the promotion of sustainable economic opportunities in developing countries, particularly in setting affected by humanitarian crisis.

• Previous experience in conducting evaluations on humanitarian action, experience conducting complex evaluations is an asset

• Excellent knowledge of the UN system, the UN humanitarian architecture and programming at the regional and country level in the Arab States region; as well as normative frameworks which guide humanitarian action;

• Experience and knowledge on gender equality and women’s empowerment and the human rights based approach, gender mainstreaming, gender analysis and the related mandates within the UN system and particularly that of UN Women’s

• Language Qualifications (Fluent in English and working knowledge of Arabic)
**Annex 2 – Evaluation Matrix**

### EFFECTIVENESS

1A. How effective have the economic opportunity models developed and / or implemented by UN Women been in helping women find employment (self or other) once project participation is completed?

2A. To what extent have the safe / social spaces established / supported through UN Women served as ‘economic empowerment hubs’, by strengthening women’s access to productive assets and skills, supporting their leadership in community life and decision making, and targeting gender-specific structural barriers and discrimination rooted in prevailing social norms and attitudes?
<table>
<thead>
<tr>
<th>Sub-questions</th>
<th>Indicators</th>
<th>Data sources and data collection method</th>
<th>Focus</th>
</tr>
</thead>
</table>
| What are the economic empowerment activities implemented in the Social/Safe Places? (broader than the economic activity) | ▪ Variety of EE activities.  
▪ Number of locations  
▪ Quality of the EE activities (quality of training, link with market needs, rights…) | ▪ Progress reports  
▪ Mapping of different intervention  
▪ Interviews with staff, women | ▪ Overview of the social and safe spaces and their economic interventions. Understanding of how these economic interventions were identified.  
▪ Engagement of women in decision making. |
| Do the social/safe places provide a holistic approach to economic empowerment resulting in positive change for women agency? | ▪ Change in gender roles and norms; self-esteem  
▪ Measurement of change in attitudes (refugee and host community)  
▪ Economic and social (well-being) outcomes. | ▪ Mini-surveys among women during field mission  
▪ Review of available case studies – women profiles  
▪ Group and individual interviews with women. | ▪ Economic empowerment alone does not contribute to change in women’s agency.  
What else is provided in the safe/social places to support women’s empowerment?  
Examples of women taking on new roles in their community and changes in their self-esteem and abilities. |
| What is the number of women reached through the different safe/social spaces? What is the % of the target group in the camp or community? | ▪ Profile of women using the safe/social spaces  
▪ Number of women accessing different types of services  
▪ Coverage. | ▪ Project reports (primary and secondary reports)  
▪ Interviews with staff managing the spaces  
▪ Visit to selected spaces. | ▪ Understanding of what motivates and encourages women to access the safe spaces and why other women do not  
What are the barriers and the facilitating factors for women accessing spaces? |
| To what extent are the safe/social spaces used by 3rd parties to support their own economic opportunities activities? | ▪ Use of spaces  
▪ External actors perceptions of UN Women safe spaces | ▪ Activity reports  
▪ Interviews with organisations using the spaces | ▪ Are the safe/social spaces seen by others as ‘economic hubs’?  
How do the economic and social interventions supported by UNW compare with the other economic opportunities provided by others in the same locations? |
| What other activities beyond the economic activities are supported (focusing on gender roles and norms; self-confidence; role in communities…) | ▪ Type and number of non-economic activities  
▪ Social changes reported at household and community level | ▪ Post activity forms completed by participants  
▪ FGDs with women participants  
▪ Feedback community members | ▪ Investigate whether mixed or integrated interventions providing economic skills and services alongside life skills and other training services appear to deliver the best results for women empowerment.  
Women’s voices in selection of activities. |
3A. What are the intended and unintended, positive and negative, effects of the intervention on women and men, institutions and the physical environment?

3B. How has the intervention affected the well-being of the different groups of stakeholders?

<table>
<thead>
<tr>
<th>Sub-questions</th>
<th>Indicators</th>
<th>Data sources and data collection method</th>
<th>Focus</th>
</tr>
</thead>
</table>
| What was the broader impact of the economic interventions on the woman, household, community, institutions? Did the different activities contribute to building trust, promote community cohesion, and reduce tension? | ▪ Equal level of engagement of both refugees, IDPs and host communities  
▪ Number of joint projects  
▪ Equal access, participation  
▪ Changes in gender roles  
▪ Changes in policies | ▪ Project visits  
▪ FGDs with women (refugees, IDPs and host communities)  
▪ Consultation with wider community and local government | ▪ Implementation of activities where there is existing or potential for social tension between refugees, IDPs and host communities.  
▪ Review secondary evidence that creating economic opportunities has a direct impact on reducing social tension.  
▪ Can changes in gender roles be attributed to the economic interventions? Are there any other factors that contribute to changes? |
| Had any of the interventions unintended positive effects? Had any of the interventions unintended negative effects that caused harm (for intended beneficiaries or on other groups)? | ▪ Level of support for / dissatisfaction with interventions | ▪ Consultation with external stakeholders  
▪ Document review, monitoring reports | ▪ Safeguards and measures in place to prevent anticipated potential negative outcomes.  
▪ Reach of the program.  
▪ Satisfaction of direct/indirect beneficiaries |

**SUSTAINABILITY AND CONNECTEDNESS**

To what extent are the models developed and/or implemented by UN Women to promote women’s economic empowerment supporting sustainable economic opportunities, particularly for host community women? What are the measures that have been built in to promote sustainability? To what extent do these measures reflect on and take into account factors which have a major influence on sustainability e.g. economic, ecological, social and cultural aspects?

<table>

<td>▪ Were women able to continue and/or expand their business activities? What were the</td>
</tr>
</tbody>
</table>
**employment, and women’s agency? To what extent did the benefits continue after the funding ceased?**

- Ongoing access to employment and income
- Behaviour change
- Policy changes
- FGDs with women beneficiaries (post-project completion)

**What are the key elements of the sustainability strategy? How is a quickly changing context considered?**

- Partnerships
- Local capacity building
- Sustainability measures
- Guidance in place
- Review of sustainability and implementation strategies
- Evaluation/review reports
- Interviews with UNW staff

**To what extent did the different economic interventions have an impact on integration/cohesion with or separation from host communities?**

- Changes in local power structures, government capacity, gender equality
- New or stronger networks
- Joint initiatives
- Consultation with wider community and local government
- Community visits
- FGDs with women (refugees and host communities)

**Did the level of investment (cost of the intervention) lead to access to sustained income and employment for targeted women?**

- Positive cost-benefit analysis of sample of economic activities
- Disaggregated data for refugee women and host community women
- Contextualized assessments based on country specifics.

**To what extent do interventions, as designed and implemented, take longer-term and interconnected problems into account? Do they contribute to interventions planned in the longer term, such as recovery or development?**

**Sub-questions (Connectedness)** | **Indicators** | **Data sources and data collection method** | **Focus**
---|---|---|---
How are the various economic interventions strategically aligned with priorities of host government, other UN programmes, and other relevant actors? | Evolution of economic interventions, Adaptations made | Country strategies, 3RP, Interviews with government counterparts, multilateral agencies and private sector actors, Evaluation Reports | Response to national and regional priorities. Opportunities and limitations linked to private sector engagement, local economic development, local job creation. Demand-driven approach |
Do the economic interventions go beyond immediate and short-term livelihood results? | Description of the outcomes, Theory of change, Assumptions | Theory of Change, Project design documents, Evaluation reports | The extent to which the intervention supports the link between humanitarian action, resilience and development. |
Which longer-term problems do the interventions take into consideration? What longer-term goals and needs are supported?
- Outcome descriptions reflect link between humanitarian action and development
- Type of interventions
- Partnerships in place
- Theory of Change
- Regional and country level strategic framework
- Project design documents
- Evaluation reports
- Partnerships with national and international NGOs, private sector, government.
- Extent to which local capacity is supported and developed.
- The exit strategy sustains interventions.

What is the potential to scale existing models to reach larger groups of women?

II. THEORY OF CHANGE: Women's Leadership, Empowerment, Access & Protection (LEAP) in Crisis Response

Goal: Women and girls affected by crisis will lead, participate in, and benefit from relief and response efforts

Key indicators: % of funding allocated to gender-responsive actions; % of women benefiting from the response

- Women-led humanitarian planning and programming are gender-responsive. If [1] women are prioritized in decision-making and programming, then [2] women will be empowered and have greater access to resources and opportunities.
- Women-led humanitarian planning and programming are inclusive. If [3] women are consulted and involved in decision-making, then [4] outcomes will be more sustainable and gender-responsive.

Outcome: Women and girls affected by crisis will lead, participate in, and benefit from relief and response efforts

- Women-led humanitarian planning and programming are effective. If [5] women are empowered and have greater access to resources, then [6] outcomes will be more sustainable and gender-responsive.
- Women-led humanitarian planning and programming are gender-responsive. If [7] women are prioritized in decision-making and programming, then [8] outcomes will be more sustainable and gender-responsive.

Outputs:

1. Gender analysis and assessments conducted to inform multi-stakeholder humanitarian response planning and programming. Results & tools on gender equality and women’s empowerment are made available to all humanitarian actors.
2. Increased leadership and engagement of women in relief efforts.
3. Increased access to and utilization of services and mechanisms to support women’s rights and gender equality.

Key Strategies:

- Advocate for gender-responsive planning and programming.
- Support women-led organizations.
- Facilitate women’s access to decision-making.

Corresponding Targets:

1. Gender equality.
2. Women’s leadership.
3. Access to resources.
4. Protection.

Assumptions:

- Women-led approaches prioritize gender equality and women’s empowerment.
- Women-led organizations are effective in implementing gender-responsive strategies.
- Women-led approaches are sustainable and lead to long-term outcomes.

Key Results & Indicators:

- Women-led organizations have increased the number of women leaders in decision-making.
- Women have greater access to resources and opportunities.
- Women-led approaches have led to improved outcomes for beneficiaries.

Facts & Findings:

- Women-led approaches have been effective in improving outcomes for beneficiaries.
- Women-led organizations have increased the number of women leaders in decision-making.
- Women have greater access to resources and opportunities.

Field & Barriers:

- Women-led approaches have been effective in improving outcomes for beneficiaries.
- Women-led organizations have increased the number of women leaders in decision-making.
- Women have greater access to resources and opportunities.

Field of Work:

- Women’s leadership, empowerment, access, and protection in crisis response.
- Gender-responsive planning and programming.
- Women-led organizations.
- Women’s access to decision-making.

• Measuring Women’s Empowerment (by the Overseas Development Institute – ODI).
• Livelihood and Employment Creation. Women’s entrepreneurship development in refugee contexts (ILO).
• Adapting and Sustaining Demand-Driven Training Programs. A case study from the Middle East. By Global Communities.
Annex 5: Interview Guidelines

For UN Women staff

- What are UN Women’s comparative advantages in supporting resilience and women’s economic empowerment in humanitarian action? (specific to the country’s context)
- What is UN Women’s resilience and WEE strategy for the country?
  - How was this strategy developed?
- What are the main internal and external challenges for UN Women to strengthen its engagement and effectiveness in WEE?
- What are good examples of promising economic interventions that the evaluation team should look at?
  - What makes this intervention ‘promising’?
  - What are main elements?
- What are some examples of less effective interventions?
  - Why did the intervention not succeed?
  - What were the lessons UN Women can draw from this experience?
- Who are the main current and potential donors?
- What economic empowerment models have been more/less effective and why?
  - What are the common characteristics?
- Did UNW support any innovative approaches?
  - Was there any third-party buy-in?

Design of the WEE interventions:

- What is UN Women’s process when designing the different in-country WEE interventions?
- Do UN Women supported economic interventions support:
  - different age-groups?
  - different socio-economic groups?
  - rural / urban / camp settings?
- How has UN Women addressed family and social pressures in the design of WEEs, as well as mobility constraints, in poorer and/or more socially conservative settings?
- What are the main employment challenges women face (individual, relational, environmental)?
  - How are these addressed in the interventions?
- When designing the interventions, how does UNW assess their costs, benefits, and sustainability?

Implementation of the WEE interventions:

- Who are the implementing partners? International NGOs, Local NGOs, Private Sector?
- What is their expertise and length of experience when it comes to implementing economic interventions?
- Does UN Women have a private sector network in the country?

**Policy engagement – Regulatory frameworks**
- What are the main obstacles impeding women’s access to livelihood opportunities?
- Which of the Jordan Response Plan object is UN Women supporting?
- What are the main advocacy points of UN Women towards the government?
  - (partial) economic integration
  - access to formal employment with protection in the workplace?
  - ‘Rights of Association’ – social structures to allow for joint enterprises?
  - any others?

**For Implementing Partners**
- What is the duration of your partnership with UN Women?
- What added value does UN Women bring to the partnership?
- What is the added value your organisation brings to the partnership?
- Does your organisation engage in advocating for the economic integration of refugees with the government?
- What projects do you implement which support refugee and host community livelihoods?
- What is your view on the sustainability of economic interventions in humanitarian action?
- Do you implement a holistic approach to livelihood opportunities?
- Where does your organisation think the emphasis should be to support the economic empowerment of women?
- Do you have experiences where ‘Cash for Work’ has supported women to engage in long term income generating activities through establishing a small business, etc.?

**Implementation process of the intervention**
- How did the selection of intervention beneficiaries take place?
  - What were the selection criteria?
  - How were the women followed up post-project duration?
- In case of skills training, how do you decide on what training to provide?
- Are interventions based on market analysis?
  - Are their links with the private sector?
- What is the likelihood of continued economic benefit to the women?
- What has been the impact of the economic intervention for individual women and their communities?

**Women beneficiaries**

*The questions will be adjusted depending on the group and the type of activity that will be visited during the in-country visits*

**In case of Income Generating Activity (IGA):**
- What can you tell us about this IGA?
  - How did you get involved with this activity?
– When did you start working?
– Did this opportunity meet your preferences?
– If not, what would you have preferred to do and why? (*link responses to individual’s skills, closer to home…*)
– Are you paid in cash or in-kind?
– How much were you paid the last time you were paid? (local currency)
– How often are you paid? Daily / weekly / monthly
– If you were offered more work at the same daily rate would you accept it?
– In a typical week how many days do you work?
– How is the working environment? (safety, length of working day, etc.)
  ▪ Were you engaged in any other income generating activity prior to this project?
    – If yes:
      • What kind of activity?
      • For how long?
      • Do you get more income now?

In case of skills training
  ▪ What training did you follow (topic of the training)?
  ▪ What was the duration of the training?
  ▪ Who provided the training? Private Sector / NGO / Consultant
  ▪ Did you choose the training? Yes / No
  ▪ Did it increase your employability? Yes / No
  ▪ Was the training linked to an internship with a private sector company? Yes / No
  ▪ What was the quality of the training? Good / Neutral / Bad
  ▪ If you were able to give the training course, what would you do the same and what would you do differently?

In case of small business
  ▪ What does the business do?
  ▪ Did you set it up with a grant or a loan?
  ▪ What is the revenue of your business each month?
  ▪ How much does it cost to run your business?
  ▪ If you have set up your own small business, would you like to expand your business?
  ▪ Do you require assistance with the following?
    – Credit
    – Skills (technical, marketing, etc.)
    – Finding ways to sell product
    – Childcare
    – Time
    – Other
  ▪ Did you have prior skills linked to the business idea? Yes / No
- Did you have any training prior to setting up the business? Yes / No. If yes which training?
- Are you part of a network of women with similar businesses?

**Opinion on women’s economic role:**
- Did your role as a woman change due to the displacement?
- What are the main obstacles you face as a woman to engage in an income earning activity?
- Did changes take place at a personal level? If yes, could you describe them?
- Did any changes take place for you at the interpersonal level (household and wider community)? If yes, could you describe them?
- Can you tell us something more about any constraints that you are facing when accessing income generating opportunities? (from family, community but also the challenges you face due to government restrictions, etc.)
- As a woman, are you organised in your community?
  - Are there any networks to support economic activities?
- Are you member of an organisation?
  - Women’s group
  - Cooperative
  - Community groups
  - Other

**Importance of different barriers to work for Syrian refugee women**
*(Rank of order of importance – first what is the greatest barrier to engaging in work.)*
- Lack of credit
- Lack of skills/knowledge
- Fear of local authorities
- Community harassment/intimidation
- Early marriage
- Domestic issues
- Conservative religious pressures

**Women’s perceptions: With which of the statements do you agree most?**

A woman can be a leader, just like a man

Men are better leaders than women

It is a waste of time to train a woman to keep financial records when you could train a man and he will do the job better.

It is good to train a woman to keep financial records because she can do the job as well as a man

A good marriage is more important for a girl than a good education

A good education is more important for a girl than a good marriage

I am equal to my peers (sisters, friends, colleagues)

I feel I do not have much to be proud of

Women are just capable as men of contributing to household income

A man’s job is to earn money; a woman’s job is to look after the home and the family

I feel safe to walk alone in the neighbourhood, the camp…

The area where I live is not safe and prevents me of leaving the home

I only want to work close to my home

If safe daily transport would be available, I would try to find work further away

Having no child care help prevents me of working or taking on more work

I have access to child care (family or a child care centre) which allows me to work
Annex 7: Country-specific context analysis

Egypt

Egypt is a signatory to the 1951 Refugee Convention, the 1967 Protocol, and the 1969 OAU Convention Governing the Specific Aspects of Refugee Problems in Africa. Visa and security requirements for Syrian refugees are strict and often result in limited access to territory and asylum, particularly for women, children, and the elderly. Syrian refugees in need of international protection face risk of prolonged detention or deportation to third party countries.

Syrian refugees in Egypt do not live in camps and are instead living within Egyptian communities. The most impacted governorates are Alexandria, Cairo, Giza, and Qalyubia. As many of these communities already face difficult living conditions with high unemployment rates and insufficient access to quality services, hosting refugees places additional pressures on limited resources and services.

State institutions play a key role in supporting Syrian refugees’ protection, education, and health needs. Their capacity to provide quality access to services and employment opportunities within communities that are already under pressure has been stretched. Perceptions within host communities of competition increase the risk of social tensions but these tensions remain limited. The Government grants UNHCR registered refugees and asylum-seekers with six-monthly renewable residency permits.

Jordan

Jordan is not a signatory to the 1951 Refugee Convention. Instead, a Memorandum of Understanding (MoU) (drawn up between UNHCR and Jordan in 1998 and revised in 2014) permits refugees as legal asylum seekers. Local ‘integration’ is thus not viewed as a possible solution within the Jordanian context. Refugees currently reside in camps (20%) and host communities (80%). The two main Syrian refugee camps (Zaatari and Azraq) were built on land provided by the authorities in northern Jordan. Outside of the camps, Syrians with UN refugee status may access basic services (schools and health), but they have no official rights to work. This has led many Syrians to work illegally in Jordan as they desperately seek to support their families.

Whilst the World Food Programme has provided food aid to the most vulnerable, in May 2015 an inter-agency assessment (UNHCR, 2015) indicated that 86% of Syrian refugees still lived below the Jordanian absolute poverty line (68 Jordanian dinar per person per month). On the basis of the commitments undertaken at the 2016 London Conference, the Government started granting a limited number of work permits for Syrian refugees in the construction and agricultural sectors. With very high unemployment rates, livelihoods and access to decent job opportunities for both refugees and host communities represent priorities for the Jordanian government.

In Jordan, the situation of refugees is shaped by gender in important ways. The rates of child marriage among Syrian refugees have increased, many refugee women have lost male family members or have become separated them, and the number of female-headed households is very high. Refugee women work mainly in the informal sector where they are at risk of exploitation and harassment and rates of domestic violence have increased due to the helplessness and frustration among male family members caused by the traumatic experience of war, violence, displacement, and unemployment.\(^{12}\)

---

\(^{12}\) CARE International, She is a Humanitarian, p.11.
Iraq
Iraq is a not a signatory to the 1951 Refugee Convention nor its 1967 Protocol. The absence of a clear and well-structured legislative framework for refugees results in inconsistency in the standards of treatment and assistance provided.
The humanitarian crisis in Iraq is entering a new phase. Combat operations against the Islamic State of Iraq and the Levant (ISIL) have ended and hundreds of thousands of displaced people are returning to their homes and communities. As many as two million displaced Iraqis are likely to return to their homes during 2018. Although major efforts are being made by the Government of Iraq and Kurdistan Regional Government to incentivise and facilitate returns, many vulnerable families are unable to return without assistance.
Displaced people from areas which are not yet stable are likely to delay their return home until conditions improve and they will continue to need support. Families living in camps and other forms of substandard accommodation are highly vulnerable and host communities throughout Iraq, and most particularly in the Kurdistan Region, are facing widespread unemployment and deteriorating public services. Irregular border openings affected the influx of Syrian refugees in need of protection. At the same time, returnees to stabilised cities (most notably women) have specific needs, mainly regarding their livelihood opportunities and protection needs.

Lebanon
Lebanon not a signatory to the 1951 Refugee Convention nor its 1967 Protocol. It responded to the displacement crisis by integrating a targeted humanitarian response within a broader plan to support Lebanon’s stabilisation in the Lebanon Crisis Response Plan (LCRP). In Lebanon public institutions face a widening gap between the scale of emerging challenges and their capacities to meet them. Political instability and economic fragility in Lebanon has created further difficulties for Syrian and Palestinian refugees. Regional, political, and religious divisions are deep and public services are overstretched. These factors, coupled with high unemployment rates, competition for jobs, and access to resources has made the coexistence between refugees and host communities difficult. Increased social tensions led the government to prohibit work permits for Syrian refugees, causing further and serious difficulty to their livelihoods and decreasing their resilience.
Generally, legal stay in Lebanon is recognised through the possession of residency documents which are obtained by Syrian refugees upon arrival in Lebanon and which should be renewed by fee payment. Residency permits are of vital importance – without one freedom of movement and access to basic services, assistance, and income-earning opportunities is reduced to that of de facto refugees.
